- Tuning SQL Queries
- Data transfer between different environments

What do we expect?
- A technical insight on the various layers of an IT environment
- The willingness to deepen your technical skills with regard to data platforms and their requirements
- The willingness to share your technical skills with the other members of our team
- You have good communication skills, can work autonomously and efficient and can communicate on a technical/project level in English and Dutch or French.
- Technical knowledge:
  - MS SQL Server, SSIS, SSRS, SSAS
  - Cluster and replication « Always on »
  - Backup and recovery
  - DB and SQL performance
  - MS SQL Server Setup for Sharepoint

- MS SCOM
- Windows server system and cluster administration
- PowerShell

What can be additional assets?

- Experience with database administration on other platforms: Oracle, MySQL and PostgreSQL
- System administration experience with RedHat Enterprise Linux, Oracle Linux, SUSE Linux Enterprise Server
- Experience with Business Intelligence
- Teaching experience
- The ability to speak multiple languages (Dutch, French, English and/or German)
- Knowledge of the Hadoop platform (HDP, IOP in particular)

What do we offer?

- Participation in a team of top data consultants
- Innovative projects in a dynamic technical context
- Rewarding projects that will allow you to steer your own career within the context of our working scope
- Open communication is part of the company culture. Your voice is important.
- Besides a competitive salary you will receive a number of extras such as a group and health insurance package, eco and culture vouchers as well as a company car.

Does this sound like your dream job? We would most certainly like to have a chat with you.

Send your CV and motivation letter to hr@infocura.be and we will get back to you as soon as possible.
